SUMMARY

I am actively looking for a job opportunity that will allow me to apply my passion, expertise, and competence. Effective at combining creativity and problem-solving to develop user-friendly applications. I was previously appreciated by employers for my strong determination and attention to detail no matter the project's complexity.

TECHNICAL SKILLS

Technical Languages: JavaScript, HTML/ CSS, jQuery, Responsive Design, Bootstrap, React.js, Node.js, MongoDB, Render, PHP frameworks like Laravel, MySQL, Heroku, Security and Session Storage, and User Authentication.

Group Project: Build a website to show current weather and events happening near by when user inputs a specific location.

Group Project: First full-stack development on book club blog post, where users can create their blog post and see others.

Individual Projects:

- Object-Relational Mapping E-commerce application, fetching and providing information regarding company employers.
- Weather Dashboard, a project that will fetch data using API and show the current weather of a specific location, as well as next 10 days weather forecast.
- Employee Tracker application, a backend application built on MySQL and Express.
- A note-taker project based on Express.js and Heroku deployment.
- A “Professional README Generator” project based on Node.js.
